

Continuous Integration Engineer in 5G Development

Power the 4th industrial revolution with 5G

Join us in the Global Technology Center Ulm where we create the software for the next generation of mobile communication that drives the automation of everything, the cloud and the Internet of Things.

We count on versatile and passionate engineers to tackle new challenges as we continue to push technology forward. We are looking for highly motivated people with a solid understanding of software engineering to become our experts.

You will work in an international environment, having the opportunity to take part in the development of new features and projects as our fast-paced business grows and evolves. You will start as a member of an agile continuous integration (CI) team.

Your tasks:

- Create and maintain a scalable CI system in our cloud infrastructure
- Develop new features for the CI system
- Enhance the CI system to improve feedback times, reliability and user experience
- Create scripts and plugins to ease daily work of software developers
- Contribute to the build system and test execution environment
- Support and advise developers on CI-related topics

Your qualifications:

- BSc, MSc or a PhD in Engineering, Telecommunication, Computer Science, Software Technology or equivalent
- Good communication in English (both written and spoken) and at least basic communication in German (level A2)
- Knowledge of languages like Python, Linux Shell, HTML, Java, Javascript, Groovy, C++
- Knowledge of tools like Git, Gerrit, Zuul and Jenkins
- You are always eager to learn more, have a good technical understanding and enjoy working as part of a team in an international environment

You will work in our Technology Center in Ulm. We offer a supportive and innovative work environment, space for individual thinking and creativity, encouraging atmosphere, flexible working time with home office opportunity, competence development and career opportunities, sports and leisure time activities.
