

Junior Baseband Platform HW Integration & Verification Engineer

Our profile

Nokia is a global leader in the technologies that connect people and things. With state-of-the-art software, hardware and services for any type of network, Nokia is uniquely positioned to help communication service providers, governments, and large enterprises deliver on the **Promise of 5G**, the Cloud and the Internet of Things.

Your challenge

You will be responsible for Integration and Verification of latest high performance Mobile Communication Baseband Modules. You will plan, design and execute tests in your own test area, being also in charge of thorough debugging and failure reporting.

What are your tasks

In your future task as BBP HW I&V Test Engineer your initial focus area will be all HW interfaces providing both connectivity within modular Baseband Products and towards external components. You will define appropriate test requirements and corresponding test strategies, and you will be responsible for the comprehensive test setups including related custom test tools. Close cooperation with product definition and design teams is vital and ensures overall alignment of corresponding test strategies.

What we expect

We expect you to be motivated and interested to work on the definition, organization, and execution of versatile HW Integration and Verification tasks in the field of mobile communication Multi Radio Base Station development. Ideally you have made already first experience with digital electronic devices testing and HW/SW testing concepts, and you have knowledge of cellular and broadband access technologies such as WCDMA, LTE, 5G. But also highly motivated newcomers with the appropriate background (like Electronic Engineering / Telecommunications / Physics or comparable education level) will be considered. We expect you to have a systematic and reliable working style. We want you to be self-driven and highly motivated.

And you? Do you like to join the next generation technology trip?

We offer a supportive and innovative work environment, space for individual thinking and creativity, encouraging atmosphere, flexible working time with home office opportunity, competence development and career opportunities, sports and leisure time activities.
